

Training and Knowledge Sharing Platform for First Responders and Educational Tools for students' and citizens' awareness and preparedness against Natural and Manmade Disasters and Risks

The RESISTANT Project

The RESISTANT project has established a heavy online presence. In this reporting period, T4.2 produced the “RESISTANT Dissemination report” (D4.2).

More specifically:

1. The project's website was regularly updated with project news, events related to the project's topic, and overall amendments for ensuring user-friendliness. In addition, the website content was always updated and enriched in the “News & Events” section with all the latest news about the activities that the project members were carrying out. Moreover,
2. The social media accounts on Facebook (page), Twitter, and LinkedIn were regularly updated to raise awareness of the project and announce other communication and dissemination means such as newsletters, deliverables, events as well as interesting news from the web related to the project's topic. On the YouTube channel, four videos have been uploaded to disseminate project initiatives and live events. In the project accounts of the two digital publishing platforms (ISSUU and Slideshare), there are fifteen publications (public deliverables, newsletters, leaflets, and press releases) each of them.
3. Two flyers were created in digital format and were distributed to the key target groups in addition to a personalized letter intending to promote “AGORA”. Both flyers are included on the RESISTANT Project website.
4. Two press releases have been issued to announce important news and achievements of the project. All press releases have been uploaded to the project website.
5. The promotion of the Resistant project, as well as the Use Cases implementation, was spread in several media (press, radio, TV, etc.).
